

Centro de Investigação
de Montanha

Dear Organizing Committee,

Concerning the Conference, i would like to thank the organization for the excellent reception, and thank you for having someone always available for us. You were very kind! Thanks to you we could take advantage of the conference and the city! It was great! It was a pity we do not speak Russian / Ukrainian in order to understand all the communications, but we could exchange views with many researchers who were very interested in exchanging ideas and contacts! It was indeed very useful, especially for young researchers like us that are taking the first steps in the scientific research!

Thanks for everything!

Best regards
Filipa Reis
